

## 07.3-001 Additional Designations for Models and Components

Models and components may have different versions, data and operations in connection with their 3- to 6-positioned designation (e. g. 126 or 126.034). These differences are identified by the following additions:

The respective model year is indicated after the nationality symbol of the national version, if necessary for distinguishing.

If no additions exist in the case of the designation of models or components, the respective data then applies to all the models or components listed in the particular case.
